## EXPERIENCE

**General Motors** *Austin, TX*

***Software Engineer, Data Governance*** April 2026 - Present

- Provide hands-on Databricks onboarding and data access support for a 5,000+ member community, including workspace provisioning, service principal troubleshooting, Terraform review, and access approvals
- Lead AI help desk rollouts for engineering teams, building conversational Slack intake workflows that replace form-first requests with guided collection and automated routing
- Build and maintain Databricks ETL pipelines for governance and access control

***Data Engineer, Connected Vehicle Data Engineering*** April 2025 - April 2026

- Designed and deployed event-driven data collection systems, processing real-time telemetry across GM's connected vehicle fleet
- Resolved production data collection failures for rental fleet partner (100,000+ vehicles) by implementing direct read method to bypass queue bottleneck, ensuring accurate fuel level and odometer telemetry

***Software Engineer, Big Data Engineering & Infrastructure*** February 2021 - April 2025

- Developed GM's custom Hadoop distribution (GMDP) by integrating open-source components including Tez UI, Ambari, and Livy, migrating from Cloudera and reducing annual costs by $1.2M
- Contributed to Apache Ambari and Bigtop open-source projects by implementing Livy service integration (Ambari PR#3790, Bigtop PR#1282)
- Automated Docker-based Hadoop development environment, reducing developer setup time from 35+ minutes to 10 minutes by eliminating manual build and deployment steps
- Responded to Log4Shell vulnerability by developing automated remediation script for production Hadoop clusters, integrating into standard startup process for ongoing protection

## PROJECTS

**Coaster: E-Ink Cycling GPS** https://paulyakovlev.github.io/coaster/

- Designing and building an ESP32-S3 cycling computer with a 200x200 e-paper display that records rides from GPS and barometer sensors to GPX files and uploads them to Strava when it reaches home Wi-Fi

## EDUCATION

**University of California, Santa Cruz** 2020

*Bachelor's Degree in Computer Science*

## SKILLS

**Languages:** Python, Java, C++, Bash, SQL, JavaScript

**Technologies:** Node.js, React, Django, Docker, Kubernetes, PostgreSQL, Databricks, Azure, CI/CD
